Capture the Moment

3D LASER ENGRAVING IN GLASS

PHOTOS ENGRAVED INSIDE THE GLASS

LCGE - KEEP YOUR CAPTURED MOMENTS!

To find your favorite picture a special place! The new elegant image will remain preserved forever! Laser engraving inside a glass product will not be destroyed, faded or otherwise damaged.

Our offer includes:

- Choosing between different shapes and sizes
- Personalized glass products as well as products with pendants/keychains (with or without LED light), engraving photos in a keychain or other office products
- Impressive background with photo
- Add a caption, date or other text to the photo of your choice.

HOW TO ENGRAVE THE IMAGE IN THE GLASS?

High quality precision green laser beams are transferred into the interior of the glass

The family

105 x 80 x 30/15 mm

140 x 105 x 35/17,5 mm

We can engrave in any shape up to 250 x 250 mm

For the optical glass surface to remain intact, Precious moment is used to create and embed hundreds of thousands of microscopic points (each with a diameter of approx. 50 micrometers) inside for a lasting memory. With superior graphics technology and tools, We engrave the subsurface (interior of the product) with a special 3D laser engraving machine.

SEND US YOUR PHOTO NOW!

To engrave your photos in the crystal glass, we need quality photo image in high resolution. For a good engraved result is based on high contrast between the person and the background (a blond person with a dark background, dark-haired person with a bright background).

To your office

200 x 300 x 20 mm

85 x 100 x 40 mm

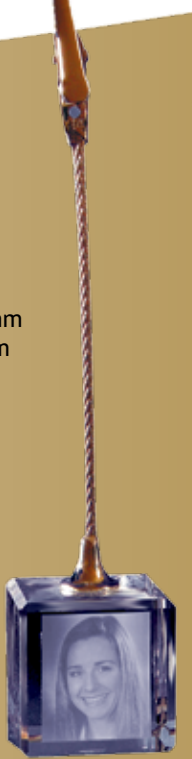

Pendants/
keychain
30 x 20 x 15 mm
25 x 25 x 5 mm
Without LED
With LED
